

One-stop solution EPC / MRO / Technical Shutdowns

SAFETY AND EFFICIENCY

In the Industrial Maintenance and Operations sector, it is essential to have a manufacturer that ensures the immediate supply of tools when and where they are needed.

EGA Master, thanks to its wide stock with immediate availability, ensures an agile response through its excellent network of distributors by putting at your disposal a commercial technician on-site to answer any questions.

ONE-STOP SOLUTION

25,000 REFERENCES - 12 RANGES

IMMEDIATE RESPONSE

WIDE NETWORK OF DISTRIBUTORS
MORE THAN 150 COUNTRIES

NON-SPARKING

The widest range of certified industrial tools for working in explosive environments due to the presence of gases or dust.

The entire range is available in both Copper-Beryllium and Aluminium-Bronze. We also manufacture products in Brass, Copper and Acetilex®.

Industrial tools with BAM certificate, German laboratory accredited by the EU.

ATEX

ATEX certified instruments for a safe work in explosive environments.

A wide range of radios, torches, hydraulic and pneumatic tools, as well as other measuring instruments with the latest technological innovations.

ANTIDROP®

The widest range of industrial tools to work safely at heights.

Innovative heat-shrink system that allows adapting any of our tools.

The system complies with DROPS guidelines.

TOTAL SAFETY SLOGGING WRENCHES

Specially designed to avoid injuries on fingers and hands thanks to its innovative removable shackle that dispenses with having to hold the wrench.

Antidrop® system included.

The system complies with DROPS guidelines.

If you would like to know more about explosive environments, visit our website:

DID YOU KNOW...

The hardness of the Cu-Be is 40% higher than the Al-Bron, so it wears less and has a 40% longer life.

The Cu-Be alloy is safer than Al-Bron because its sparks have less energy. Cu-Be is especially recommended in atmospheres listed under the IIC group.

For environments with acetylene, **EGA Master has developed a new alloy called ACETILEX®. This is the only safe option in environments with acetylene** (it has less than 65% of copper in its composition, thus it's safe).

PIPE TOOLS

The widest range of pipe tools and machines designed for use in demanding and heavy industrial environments.

Our innovations and patented pipe tools such as our Mastergrip make your work more efficient than ever.

CONTROLLED TIGHTENING

The widest range of tools for controlled tightening. Advice and customized developments.

The range includes from digital torque wrenches (torque checking QC, mini, interchangeable heads torque wrenches...) analogic torque wrenches (mini, interchangeable heads, preset torque, dial, 1000V insulated torque wrenches...) hydraulic and battery-powered torque wrenches, to torque multipliers and calibration and control tools.

UNDERWATER USE AQUAMASTER

Hydraulic and pneumatic equipment designed for underwater use and to work at any depth achievable for divers.

The range includes grinders, impact wrenches, drills and saws among others.

FOAM TRAYS AND TOOLS PERSONALIZATION

We also mark each tool with your logo, company name or workshop name to increase its traceability and reduce costly losses!

For a better tool control.

We personalize the design of each Foam tray for roller cabinets, tool boxes, suitcases or tool sets.

100% personalized and tailor-made!

WHY DOES THE INDUSTRIAL MAINTENANCE AND OPERATIONS SECTOR TRUST EGA MASTER?

12
RANGES

THE WIDEST PRODUCT RANGE

We are the only manufacturer that offers a one-stop solution to reduce the administrative and logistic costs of procurement processes.

We manufacture 12 ranges and 25,000 references!

FLEXIBILITY AND PERSONALIZATION
